

The first thing to know is that there is not just one puppy vaccination schedule for all dogs. Factors such as which part of the country you live in, and your dog’s individual risk factors will come into play. Some dogs do not need every vaccine. This decision is between you and your veterinarian. Always discuss puppy vaccinations at your regularly scheduled appointments.

<b>Puppy’s Age</b>	<b>Recommended Vaccinations</b>	<b>Optional Vaccinations</b>
6 - 8 Weeks	Distemper, parvovirus	Bordetella
10 - 12 Weeks	DHPP (vaccines for distemper, adenovirus [hepatitis], parainfluenza, and parvovirus)	Influenza, leptospirosis, bordetella, lyme disease
16 - 18 Weeks	DHPP, rabies	Influenza, lyme disease, leptospirosis, bordetella
12 - 16 Months	DHPP, rabies	Coronavirus, leptospirosis, bordetella, lyme disease
Every 1 - 2 Years	DHPP	Influenza, coronavirus, leptospirosis, bordatella, lyme disease
Every 1 - 3 Years	Rabies (as required by law)	None
